- \* The result below was calculated based on the estimation that the price of bitcoin (BTC) would rise by 40% every year starting at \$ 4,000 in January 2019 and \$ 8,000 in July 2019 and rise by 100% in 2024 when halving will happen.
- \* The result below was calculated based on the estimation that the transaction volume at the exchange in 2020 would start at the scale of global top 20 as of January 2019 and rise by 5% every month with an exchange commission rate of 0.15%.
- \* Lock-up : Staking of 900 million GOLD Tokens assigned to contract contributors, project contributors, development team, marketing and PR will be available from August 2019. A total of 4 billion GOLD Tokens held by the Foundation, local corporation, and stakeholders will be released from lock-up by 10% every six months from June 1, 2021 and will be used for additional infrastructure expansion, marketing expenses, etc. in order to respond to rapid market changes. The staking for Token transactions and contribution rewards is allowed only for the Tokens released from lock-up.
- \* The Golden Goose team aims to establish and expand three mining centers, each of which operates a 500 MW substation and 300 units of Bittfury BlockBox AC (BBAC).
- \* The following result was calculated based on the estimation that the mining rate per hashrate would fall by 20% each year.
- \* The volume of staked Tokens was calculated at 85% of the total volume of available Tokens to stake, excluding lock-up and pre-sale volumes.
